

WeekReport_2019-04-22_04-28_E

Week Overview

- This week I merge Shaojie's code and modify some part
- $9 + 9 + 8 + 9 + 8 + 0 + 8 = 51$ hour

Project: GraphLayout

- understand the visualize part of our code
- modify the multilevel part, merge two functions for different floor to one
- Due to the modify of multilevel part, different floor can use the same part code in visualize
- merge the GPU code from Shaojie to our CPU code, now we can compile the GPU version and CPU version in the same branch
- But cudaDeviceSyncChronize has some problem, the GPU version sometimes run out

Go to Zhijiang Lab

- We will go to zhijiang lab for the large-graph project
- I will be familiar with the environment next week.

Other

- recite Word List 2
- Attend contest in codeforces.com

Short-term perspective

Work	deadline	Tip
solve the bug in GPU	Fri	
Go to Zhijiang Lab	Mon	

Long-term perspective

Work	deadline	Tip or Progress
GraphLayout	6.1	modify the GPU
